Markdown Examples

Text

It's very easy to make some words **bold** and other words *italic* with Markdown. You can even link to Google! (<http://google.com>)

Headline Subslide

Code

```
var s = "JavaScript syntax highlighting";
alert(s);

s = "Python syntax highlighting"
print s

No language indicated, so no syntax highlighting.
But let's throw in a <b>tag</b>.
```

Python example

Code

```
# This program adds up integers in the command line
import sys
try:
    total = sum(int(arg) for arg in sys.argv[1:])
    print 'sum =', total
except ValueError:
    print 'Please supply integer arguments'
```
